Subject: Info request for the City of Adel on Public Notice

Good morning Ryan, please send a copy of "Deriving effluent limitations from the Raccoon River TMDL", memo and the TKN calculations? I'm trying to understand why the TKN TMDL WLA of 133 lbs/day was changed to TKN limit of 413 lbs/day in the draft permit using the memo mentioned above (these are daily max limits). The TKN calculations were not included in the WLA part of the fact sheet. Thank you.

I am placing the City of Adel NPDES draft permit on public notice today. Attached is the 2022 application for their new WWTP that is nearing completion.
